

Your Facility's Performance on 7-Day Risk-Standardized Hospital Visit After Colonoscopy

Table 1: Your Facility's Performance on Hospital Visit Rate After Outpatient Colonoscopy Measure

This worksheet contains facility, state, and national-level results.

GREEN MOUNTAIN SURGERY CENTER

Reporting period: January 1, 2017 through December 24, 2019

Your Facility Performance Overview	Colonoscopy 7-Day Hospital Visits
Comparative Performance at Your Facility ^a	No Different than the National Rate
Total Number of Eligible Cases at Your Facility	257
Risk-Standardized Rate for Your Facility ^b	11.7
Lower Limit of 95% Interval Estimate	8.3
Upper Limit of 95% Interval Estimate	16.1
National Observed Rate ^b	12.0
Additional Performance Information^c	--
Total Number of Outcomes for Your Facility	2
Observed Rate for Your Facility ^b	7.8
Average Risk-Standardized Rate in Your State ^b	11.7
Total Number of Outcomes in Your State	2
Number of Eligible Cases in Your State	257
Observed Rate in Your State ^b	7.8
Total Number of Outcomes in the Nation	30,687
Number of Eligible Cases in the Nation	2,559,221

^a Your facility's performance categorized as better, no different, or worse than the national rate; number of cases too small; or N/A. Number of cases too small = number of colonoscopies too small (fewer than 30) to reliably estimate the facility's risk-standardized rate.

^b For the colonoscopy measure, this is the rate per 1,000 colonoscopies.

^c These statistics are not publicly reported but appear in the rows below for your reference.

N/A = No data are available from the facility for this measure.
